

K BEAD

K BEAD is a range of durable uPVC beads designed to be used with K Rend renders. They are ideal for damp, wet or corrosive environments or where plaster drying times may be extended.

Plastic beads are uniquely rigid and yet are resilient enough to form complex curves and arches.

Unlike stainless steel, powder coated or pre-galvanized beads K Bead's are cost effective and a pleasure to work with, ensuring no sharp metal edges to cause injury. K Bead's do not corrode.

- ▶ Easier to cut
- ▶ Simple to install
- ▶ Quicker to use
- ▶ Less wasteful
- ▶ Capable of forming complex curves and arches

All K Bead's are supplied in both white and ivory as standard. We can however, supply any colour of bead. Minimum order quantities may apply.

Prices are available on request.

Feather edge angle bead
25 x 3m

Expansion bead
25 x 2.5m

Stop bead
50 x 2.5m

Bellcast bead
50 x 2.5m

Drip bead
50 x 2.5m

K BEAD Guide
